Unstake - latest

Summary

This contract is a companion contract to the main stake contract. It ensures properly unstaking assets from the stake state

Parameters

Parameter	Description	Type	Default
imPaideiaDaoKey	Token ID of the dao config nft	Coll[Byte]	

Registers

Register	Description	Type

Assets

Token name	amount

Transactions

Transaction name	Transaction description
Unstake	In this transaction the assets belonging to the user are removed from the stake state

Unstake

In this transaction the assets belonging to the user are removed from the stake state

Context Variables

CV Index	Type	Description
0	Coll[Byte]	Proof for retrieving current DAO Config values
1	Coll[(Coll[Byte],Coll[Byte])]	Operations to perform on stake tree
2	Coll[Byte]	Proof for getting current stake
3	Coll[Byte]	Proof for removing the stake

Config

Config key	Type	Description
im.paideia.staking.state.tokenid	Coll[Byte]	Token ID of this DAO's stake state token
im.paideia.contracts.staking.unstake	PaideiaContractSignature	Signature of the unstake contract

Inputs

Utxo type	Description
StakeState	The utxo containing the staking state

Unstake	The utxo ensuring proper execution of unstaking assets

Data Inputs

Utxo type	Description
DAO Config	Config utxo of this DAO

Outputs

Utxo type	Description
StakeState	The utxo containing the updated staking state
Unstake	A copy of the input utxo
User	The utxo containing the unstaked assets
Miner	Miner fee

Conditions

1. DAO Config input is correct
2. Stake state input is correct
3. All governance tokens are unstaked
4. All erg profit is unstaked
5. Only one unstake done
6. AVL Trees updated
7. Staker count decreased by 1
8. Register values not relevant to this action in the stake state are unchanged
9. Stake is not locked
